

How to enter the top world university

Why can you do this?

Everything is not as scary as it may seem at first glance, the main thing is to know what and how to prepare. By the way, the cost of studying in Europe can be comparable to Russian universities, and even lower. For example, the cost of studying at French state universities sometimes does not exceed 1000 euros per year, which is significantly cheaper than even at the average Moscow institutes. Many German universities are generally free of charge even for foreigners.

With language, too, everything is quite simple. In many (especially Moscow and St. Petersburg) schools, foreign languages are taught at a high level today. You can pick up the language with regular tutors or language courses. Increasingly, Russian parents have been enrolling children in language courses since high school, just for general development. Then by the end of school, the need for a language tutor disappears altogether. Of course, this applies primarily to English-speaking countries, but even less popular French or Spanish languages can be lifted to an acceptable level within six months, a year of regular classes.

What about entrance exams?

In our country, the income depends on the EGE points. The West also has its analogues, which, like the EGE, can be well prepared in advance. For example, there are two standardized tests in the US: SAT and ACT. The former is more common in coastal states and includes questions on text analysis, math, and English. The second is more widespread in the western and southern states and also contains questions on the natural sciences. Finding tutors for such tests is difficult, but you can try to prepare yourself. To do this, I advise you to buy an official SAT or ACT training guide, they are issued by the organizations that conduct these tests. These exams, frankly, are no more difficult than the exams, they just have their own specificity.

But still need to write an essay?

The most difficult moment when entering a Western university is an introductory essay. It differs significantly from the usual students' works. For admissions committees, the essay is the only way to know the important qualities of the applicant. It is in this text that he must show his erudition, ability to think logically and nonstandardly, to present ideas in a structured way, as well as creativity and life orientations. Therefore, it depends on the essay whether the applicant will enter the university or not. Do you want to write on the topics of entrepreneurship, education and technology? Everyone can become an author of Rusbase Young. Learn how

Of course, good text should be backed up by high scores based on a standardized test, but even a maximum score on it will not save the incoming essay. Please note that each institution has its own views on the creative assignment, so the same material can be simultaneously recognized as successful at one university and unsatisfactory at another. Therefore, when preparing, it is important to determine in advance which institution or universities you want to enroll in, and to select tutors from these universities. The Internet makes it possible to find people directly related to the university of choice senior students, graduate students or even members of the admissions committee. They can agree to counseling or tutoring. This is a great way to understand what each essay is worth paying attention to and what to refrain from.

What else is left?

Another important part of the application is your activities outside the school curriculum. These should not be just foreign language courses, but also some leadership initiatives and projects related to the specialty of interest. Participation in special summer programs at Western universities and educational tours will greatly increase the chances of admission.

The main factors that will help almost any schoolboy to succeed when enrolling in leading Western universities:

Good level of foreign language.

Preparation for standardized test. I recommend starting as early as possible, with grade 9-10, but with sufficient desire and diligence, you can prepare for the year. There are usually one to two sessions per week.

Preparing for essay writing. This is the most difficult and unusual stage. Here it is very important to find a mentor from the right university and to deal with it regularly, absorbing the values of a particular university. On average, it takes up to a year of classes 1-2 times a week to prepare. But everything is extremely individual

Extracurricular activities. These can be a variety of activities from participating in charitable projects and passing internships and internships to educational courses. There are no clear criteria here, but it is recommended to start preparation with grades 9-10.
